AMULET

in | | | |

We would like to inform you that the **deadline for submission of applications has been extended!**

The new deadline is 27th March 2023, at 17:00 CEST.

This would enable many SMEs that might be interested in participating to apply for the AMULET 2nd Open Call.

The project **Advanced Materials & Manufacturing United for LightwEight**, AMULET, aims to benefit from the innovation potential of SMEs that will be **creating new value chains by fostering the penetration of advanced lightweight materials** in four sectors:

BUILDING

**AEROSPACE
& AERONAUTICS**

ENERGY

AUTOMOTIVE

The trans-European project **AMULET** aims to enhance the innovation potential of SMEs through a cross-sector and funded knowledge exchange. For this reason, the second Open Call of the project will be selecting consortia of **minimum 2 and maximum 3 legal entities including exclusively SMEs** to lead bottom-up projects that address the development and implementation of demonstration activities around technology and systems applicable to the [12 challenge areas](#) given. The **consortium will receive up to 120K€** (60K€ for SME), plus **funding and business training support**.

projects that address the development and implementation of activities around technology and systems applicable to **4 sectors: automotive, aerospace&aeronautics, energy, and building** and **3 materials: fibre-reinforced polymers, ceramic matrix composites and light metal alloys**.

AMULET will encourage the development of solutions to challenges that are currently blocking the penetration and market uptake of three main advanced materials for lightweighting in the four strategic sectors. Linking innovations from one sector into another value chain can effectively result in new solutions and opportunities, thereby building new industrial value chains.

You can start filling in your application anytime here:

Partnership

The **AMULET** consortium consists of **7 clusters**: POLYMERIS (FR) which is the project's coordinator, Bydgoszcz Industrial Cluster Tool Valley (PL), Advanced Materials Cluster of Catalonia (ES), IMAST (IT), West Hungarian Engineering Cluster (HU), Clust-ER MECH (IT), Moravian-Silesian Automobile Cluster (CZ), **4 RTOs**: Chemnitz University of Technology (DE), Jožef Stefan Institute (SI), Flanders Make (BE), Norwegian University of Science and Technology (NTNU) and **2 SMEs**: FundingBox (PL) and Bax&Company (ES).
